

ROHAN SHARMA

Darjeeling, India • +91 9531641600 • workatrohh@gmail.com • Github • Linkedin • portfolio

Professional Summary

ML/Data Engineer building scalable data pipelines and ML systems. Proficient in Python, TensorFlow, PyTorch, SQL, and data engineering fundamentals from M.Tech AI/ML studies and hands-on internship work. Fast learner, team player, committed to understanding and quality code.

Experience

Darwin Box (HR & Payroll SaaS)

Nov 2023 – Jan 2024

Data Analytics Intern — Remote

- Designed and implemented automated ETL pipelines using Python (Pandas, NumPy) and SQL; reduced manual processing from 8+ hours weekly to 15 minutes per report, saving 20+ hours/month.
- Implemented predictive maintenance strategies using statistical analysis and trend detection, achieving a 20% reduction in equipment downtime and 15% maintenance cost savings.
- Identified workflow bottlenecks and provided 7+ optimization recommendations, with 5 implemented resulting in a 30% improvement in process efficiency.

Rdr.inc (Risk Management & Data Analytics)

May 2022 – Dec 2022

Data Analytics Analyst Intern — Remote

- Analyzed 120K+ records using Python and SQL to identify risk patterns, reducing risk exposure by 25%.
- Built predictive risk models using scikit-learn, achieving 82% validation accuracy.
- Developed automated validation scripts reducing manual QA effort by 35%.

Projects

Northstar (KPI Intelligence Dashboard) — Interactive Python-Tableau dashboard with real-time anomaly detection and automated decision recommendations.

Physics-Informed Neural Networks (PINNs) for Fluid Dynamics — Applied PINNs to predict fluid flow behavior for 3D shapes, reducing computational cost by 70% and improving accuracy by 23%.

Feel CV: Intelligent Resume Parser — Full-stack browser extension leveraging LLM APIs to extract structured candidate data from resumes and auto-populate job applications, reducing manually entry by 67%.

Blue Quants & Time-Series Analysis — Quant analytics platform that ingests live market, news/sentiment, volume/sector/technical signals to generate evidence-based explanations of stock moves, cutting “blind” decisions 30–50% and speeding trade reviews 2×.

Skills

Languages & Tools: Python, SQL, Tableau, Excel, Git, TensorFlow, PostgreSQL, MySQL

ML & Analytics: LSTM, PINNs, PyTorch, Predictive Modeling, Feature Engineering, Anomaly Detection, Classification, Time-Series Forecasting (ARIMA)

Cloud & Other: AWS (EC2, S3), Databricks, GCP (BigQuery), JavaScript, React

Education

National Institute of Technology Sikkim

GPA: 7.7/10

M.Tech in AI & Machine Learning

Expected - Jun 2027

Siliguri Institute of Technology

GPA: 9.0/10

B.Tech in Computer Science & Engineering

July 2024

Certifications

AWS Certified Solutions Architect – Advanced Networking — CS50 (Harvard) — Data Science using ML (+40hrs)
React Framework (Implemented and learning)
Computational Fluid Dynamics (Learning In Progress)

Awards & Credentials

- 1st Runner-up Intel Ideathon and Intel INNOVATEathon 2023
- Solved 356 LeetCode Problems (Top 25th Percentile)
- AWS Certified Solutions Architect – Advanced Networking
